HYUNDAI WIA Multi-tasking Machine

HYUNDAI WIA | CREATING VALUE IN SEAMLESS MOBILITY

Technical Leader

Multitasking Machine **XM Series**, designed by HYUNDAI WIA with years of expertise and the latest technology, is designed to maximize productivity by utilizing mill head and lower turret.

XM Series

9-axis Multi-tasking Machine

- The adoption of a milling head with a built-in motor B axis (0.0001°) enables the operator to perform turning and milling works in perfect harmony
- Expanded machining area by shortening the length of the mill head
- Y-axis travel distance increased : 250 mm (9.8″) -> 300 mm (11.8″)
- Application of CAPTO C6 tool for high speed complex machining
- The model features built-in 1st & 2nd-spindles with high power and high torque

Applications & Parts

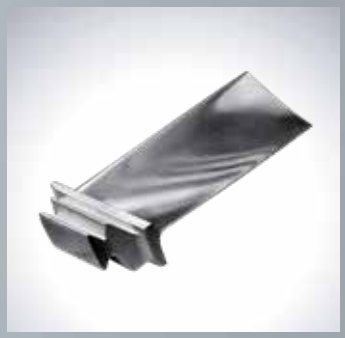
VACUUM PUMP ROTOR

IMPELLER

MOUNTING SHELL

ARTIFICIAL BONE

HOUSING, ELECTRIC MOTOR



BLADE, COMPRESSOR

HOUSING, ENGINE

CRANKSHAFT

01 BASIC **STRUCTURE**

Multitasking machine for high productivity

※ This model is **ST** type

6/7/9-AXIS MULTI-TASKING MACHINE

❶ Built-in Spindle (1st/2nd)

XM Series 1st/2nd built-in spindle minimizes vibration to allow machining of the highest precision.

• Chuck Size (1st/2nd) XM2600 : **10″/10″**, XM3100 : **12″/10″**

❷ Compact Mill Head

The B-axis control mill head is mounted with a high resolution encoder having a built-in motor and 0.0001° indexing ability to secure high positioning precision.

• Driving Methode : **Built-in** • Speed : **12,000** r/min

❸ Lower Turret (ST Type)

The lower turret ensures high-speed machining of complicated shapes in precision only with one-time setting of workpiece machined with the mill head.

• Std. : **Turning Turret** • Opt : **BMT65 Mill Turret** (5,000rpm)

❹ ATC & Magazine

The installation of magazine on the front provides efficient tool change and tool setting. Magazine with chain driving method provides 40 tools as standard, and 80 tools as option.

• Tool Shank Type : **CAPTO C6** • Tool Change Step : **4** Step

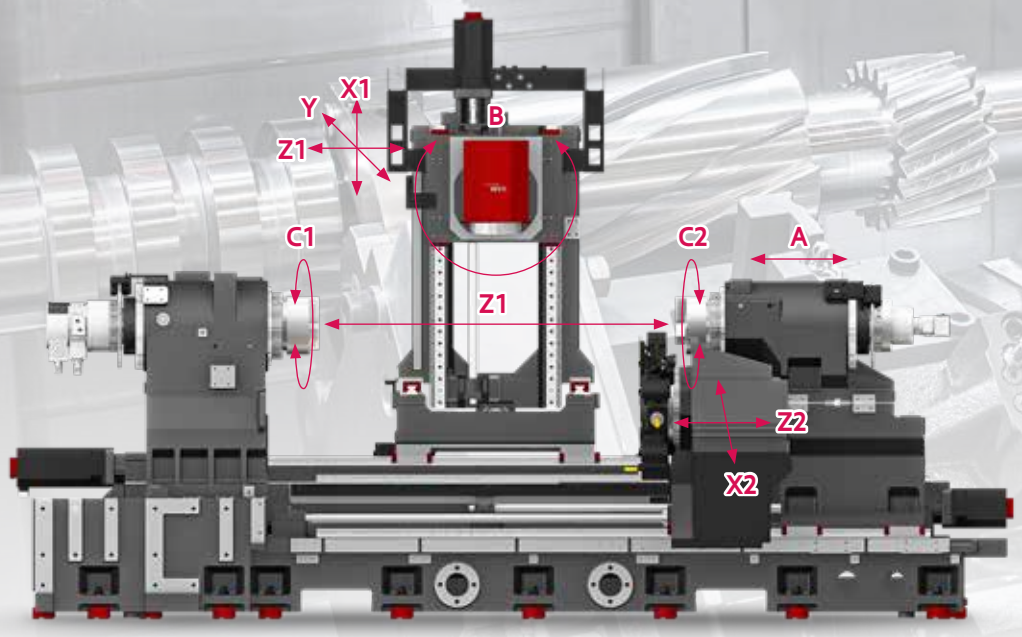
BED

❺ Secure Bed Structure

It enables high-speed/high-precision machining by significantly lowering the center of gravity of the bed, and stably arranging key units including the main spindle and columns on the bed. In particular, the cover is designed so that chips and cutting oil are not directly transferred to the bed, reducing precision errors due to temperature changes.

02 HIGH-SPEED TRAVEL

High-speed, high-productivity multi-tasking machine



※ This model is **ST** type

Travel (X1/Z1/Y/X2/Z2/A) (27.4"/11.8"/62.4"/9.3"/60.6"/62.8" <ST : 60.6">)

695/1,585/300/235/1,540/1,595 <ST :1,540> mm

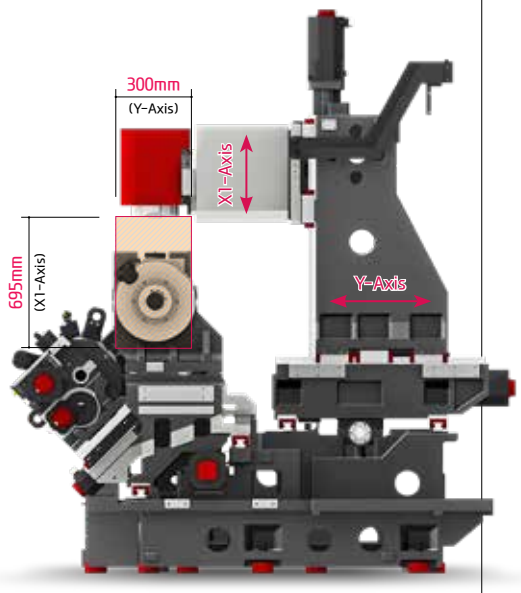
Rapid Traverse Rate (X1/Z1/Y/X2/Z2/A)

48/36/48/24/36/30 m/min

B-axis

240°(±120°)

HIGH SPEED & HIGH PRECISION



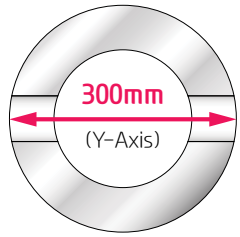
Y-AXIS

Cross Type Y-axis

The cross type Y-axis ensures excellent positioning accuracy and provides easier programming and correction of programs which helps in enhancing productivity.

Wide Machining Range of Y-axis

The adoption of Y-axis with wide cutting range of 300mm(11.8″) allows Y-axis cutting in a single step without having to rotate the C-axis, and improves the cutting pitch and precision level.



Previous Model	250 mm (9.8″)
XM Series	300 mm (11.8″)

50 mm Increase

GUIDE WAY

High-Speed Roller LM Guideway

Linear roller guideways are applied to reduce non-cutting time and bring high rigidity.

Ball Screw Nut Cooling (Z1/Y/X1 axis : Std.)

The Z1, Y, and X1 axis, which have a higher transfer frequency than other axis, use the ball screw nut cooling method as standard to minimize thermal displacement due to the frequent repetitive motion.

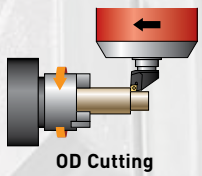
Linear Scale OPTION

Linear scales on all axis providing high precision positioning accuracy and compensates for ball screw thermal displacement ensuring extremely precise machining.
In addition, the absolute type linear scale is installed in close proximity to the ball screw of each axis.

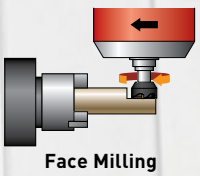
03 COMPACT MILL HEAD

Milling heads for machining complex shapes

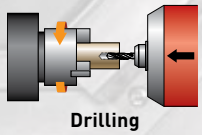
Machining Variation



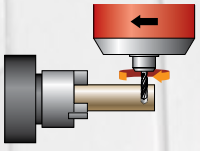
OD Cutting



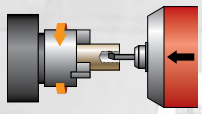
Face Milling



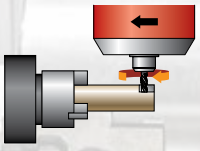
Drilling



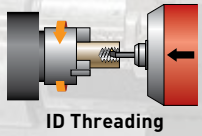
OD Drilling



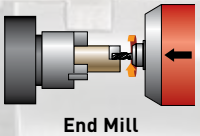
ID Cutting



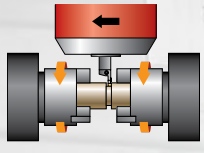
Ball-End Milling



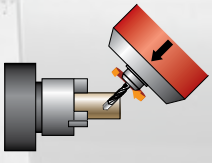
ID Threading



End Mill



Cut-Off

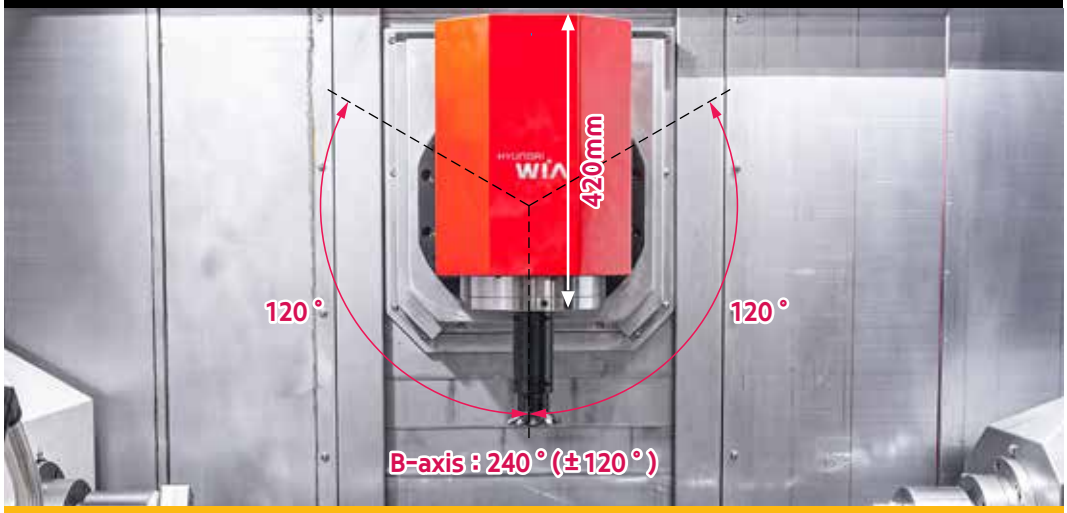


Angular Machining

MACHINING PROCESS WITH ONLY ONE INITIAL SETTING

Millhead for multi-tasking

The XM Series is the culmination of HYUNDAI WIA's technological prowess, capable of machining any product of complex shape required by a customer through its mill head and lower turret.



Expansion of machining range

The length of the mill head has been reduced by 130mm (5.1") compared to the previous model to expand the machining range.

Compact Mill Head with a B-axis Operated by a High-precision DDM

The mill head is a product of combining HYUNDAI WIA's latest technologies. The B-axis operated by DD motor method (0.0001°) to eliminate rotational backlash and 1st spindle (0.0001°) together can machine impellers, blades and other simultaneous 5-axis machining (standard application).

Also, it can perfectly carry out machining of workpieces with complex shape including sloped surface, etc

Mill Head Specifications

Driving Method	Speed	B-axis Travel	Indexing Angle	Tool Shank
Built-in	12,000 rpm	240° (-120°~+120°)	0.0001°	CAPTO-C6

CAPTO-C6

CAPTO-C6, which allows double-sided circulation, is applied as a standard for maximum cutting capability.

- Ideal over load analysis
- Decreased tool change time by short taper / Excellent cutting ability

04 HIGH PRECISION **SPINDLE**

High-precision spindles that maintain precision even during prolonged machining

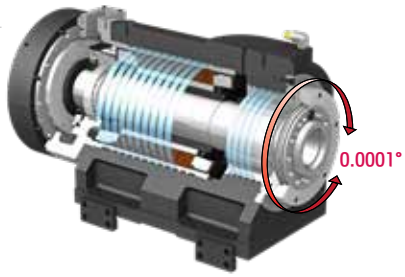
TWIN BUILT-IN SPINDLE FOR HIGH PRODUCTIVITY

SPINDLE

Built-in Spindle (1st/2nd)

The 1st and 2nd spindles with a built-in motor structure can minimize the vibration and heat generated during high-speed rotation, which makes them ideal for high-precision machining.

Also, Machines with a 2nd spindle can perform secondary operations with a single setup, increasing flexibility and productivity.

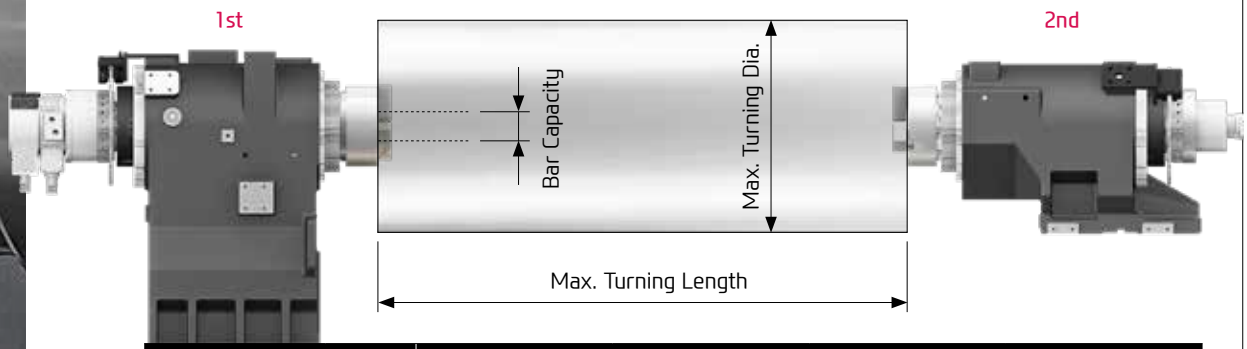


C-Axis Control - C-axis control of 1st and 2nd spindle allows machining of various products

1st Sp. C1-axis : **0.0001°**	2nd Sp. C2-axis : **0.001°**

Spindle Oil Cooling

The 1st/2nd spindles have been fitted with cooling units as a standard feature to minimize thermal displacement generated during cutting works, maintain a constant temperature, and increase cutting stability.



XM Sereis		XM2600		XM3100	
		1st	2nd	1st	2nd
Driving Methode	-	Built-In			
Max. Turning Dia.	mm(in)	Ø660 (Ø26")			
Max. Turing Length	mm(in)	1,540 (60.6")			
Chuck Size	inch	10"		12"	10"
Power (Max./Cont.)	kW(HP)	30/22 (40/29.5)		37/25 (50/33.5)	30/22 (40/29.5)
Bar Capacity	mm(in)	Ø81 (Ø3.2")		Ø102 (Ø4")	Ø81 (Ø3.2")
Spindle Speed	r/min	4,000		3,000	4,000

05 LOWER **TURRET** (ST TYPE)

Lower turrets for improved productivity

Turret-attached Type Rest (ST Series) **OPTION**

It guarantees machining stability by preventing tilt and shaking during machining of products such as long shafts. SLU3.2 Rest can also be applied for machining large workpieces.

Turret Specifications

No. of Tools	**Tool Size** (O.D/I.D)	**Indexing Time**
12 EA	□ 25/Ø40 mm (□ 1″/Ø1 1/2″)	0.2 sec

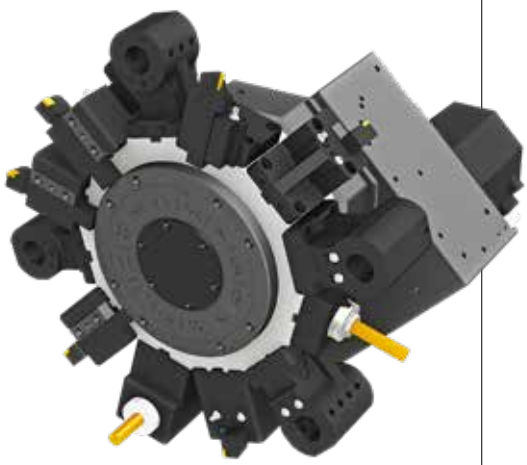
SIMULTANEOUS TURNING WITH THE MILLING HEADS

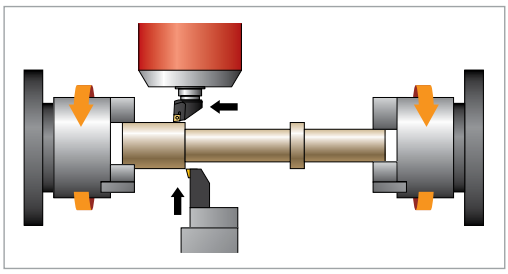
TURRET

Mill Turret OPTION (Std : Turning Turret)

The lower mill turret (Opt.) ensures the high-speed machining of complicated shapes in precision only with the one-time setting of an object to be machined with the mill head and complex machining.

- Speed (rpm) : 5,000 r/min
- Collet Size : Ø20 (0.8") / ER32
- Indexing Time : 0.2 sec





Enables Simultaneous Turning for Milling heads and Lower Turrets

The ST model, with its upper milling heads and lower turrets, enables simultaneous turning.

Simultaneous turning options for both OD ↔ end face and roughing OD ↔ finishing OD help improve the productivity.

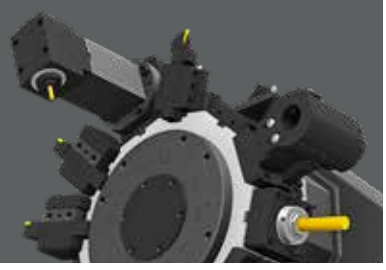
SPECIAL HOLDER

OPTION

The XM2600ST/XM3100ST, compatible with a lower mill turret (optional), allow to process the keyway from the inside of the material using a connector attached to the rotary tool holder.
More importantly, it is a Hyundai Wia's patented, customized solution for improving the tooling efficiency of new parts including motor housings for electric vehicles.

Mill Holders Attachments

- Offset length: 50 – 250mm (manufactured according to customer's workpieces)
- Applicable to both angular & straight milling heads
- The special holder (BMT45) is not compatible with BMT65 for lower turrets



❖ Consultation needed when ordering these options.

06 USER CONVENIENCE

Various Devices for User Friendly

The XM Series offers Ergonomic Design for Easy Operability and Maintenance.

Improved Access with Larger Front Door

The adoption of a larger front door makes crane access for cutting preparation works, such as setting up workpieces, much easier.

Highly Accessible Spindle

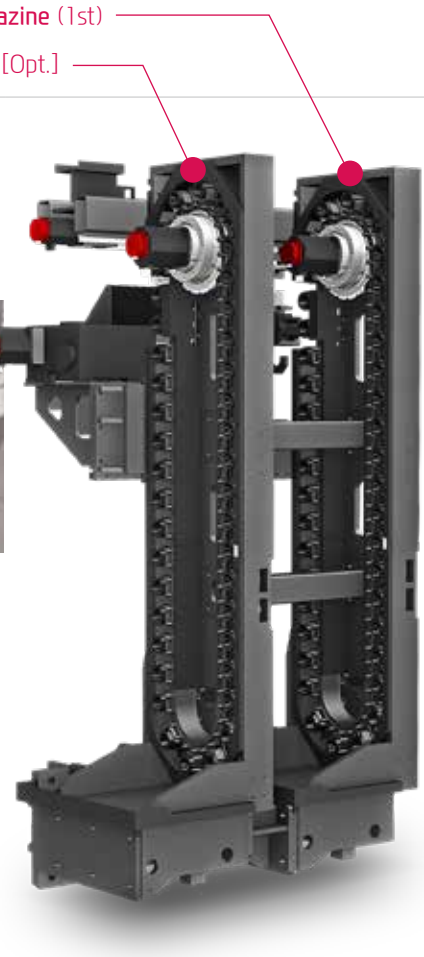
The spindle's ergonomic design improves access for the chuck and makes it easier to set up workpieces. The height from the floor to the center of the spindle has been carefully considered in order to improve the operator's convenience when setting up work pieces.

Operation Panel

The arms for the OP box and the OP box can rotate independently, which makes operating convenient depending on the workpiece setting or worker position thus allowing the user to easily move the arms to desired location.

HIGH RIGIDITY, TOOL CHANGE SYSTEM

AUTOMATIC TOOL CHANGE SYSTEM



ATC & Magazine

There is a magazine on the front side of the machine for efficient tool exchange and setting, and tool exchange operation is simplified and highly reliable. The tools are also fed in the quickest routes, which allows prompt replacement of tools.

ATC Side Repair Window (80 ATC)

You can easily access the ATC through the side repair window if inspection or cleaning of the ATC is necessary.

Automated Tool Attachment/ Detachment Device (Std.)

The automated tool attachment/detachment device uses an air cylinder for easy tool attachment/detachment.

ATC & Magazine Specifications

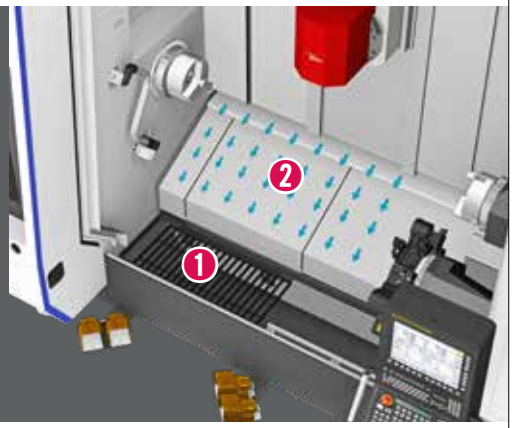
No. of Tools	Max. Tool Length	Max. Tool Dia. (W.T/W.O)	Max. Tool Weight
40 [80] EA	450 mm (17.7")	Ø90/Ø130 (Ø3.5"/Ø5.1")	12 kg (46.3 lb)

❶ Internal Maintenance Foothold (Std.)

There is a foothold within the machine for the worker to be able to maintain a stable posture when accessing the equipment.

❷ Bed Lower Flushing (Std.)

The entire upper surface of the slide cover features a flushing structure, which allows the slide cover to be maintained in a clean state at all times (patented).



XM SERIES

07 FANUC

The Compatible All-round Control

FANUC 31i-B5 PLUS

This is the core model of FANUC CNC with the performance of the world highest level. With abundant functions and high-speed, highly-accurate and high-quality machining technology, it is the most suitable for a high-grade and machining center.

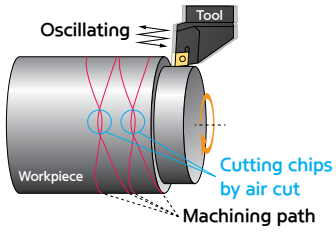
15″ Touch Screen Monitor Applied

- Control axis : 9 axis (X1, Y1, Z1, B1, X2, Z2, A, C1, C2)
- Simultaneously controlled axis : 5 axis
- Part program storage size : 4 Mbyte (1,024m)
- No. of registerable programs : 1,000 EA
- Tool offset pairs : 400 pairs
- Look-ahead block : 1,000 block
- Conversational auto program : Smart Guide i

The XM Series has a 15″ large monitor for enhanced visibility. In particular, we can create more convenient use conditions by improving the operating environment such as program setup and simulation through a large screen.

Chip Bareaking OPTION

- Machining Method : he tool cuts the workpiece moving in a zigzag pattern. (Oscillating) → Air cut section occurs → Long chips break
- Advantage : Increase tool life, Enhance surface finishing, Improve chip disposal
- Machine : All turning centers with FANUC controller (Option)



(Developed special screen page for servo learning oscilliation function / Even when this function is applied, the cycle time remains same.)

ACAM (Automatic CAM)

Cloud-based
Intelligent Programming

Cloud-based automatic CAM S/W that automatically creates NC programs only by inputting drawing files

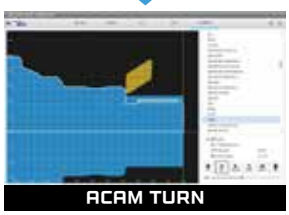
Material definition
Block/Shape Cutting
condition DB by materials

Model Input
2d/3d drawing input

Tool Definition
Tool library
Tool's file In/Output

Automatic Process Creating
Intelligent automatic
process creating

Simulation
2D/3D simulation
File transfer to machine



MMS (Machine Monitoring System)

1. MMS Cloud
A cloud server-based equipment monitoring system for collecting and analyzing facility operation data.

2. MMS Edge
A client server-based tool monitoring system for collection/analysis of facility operation data. (Compatible with client MES / ERP interface)

SMART CNC (FANUC SMART PLUS)

1. Dialogue Program (Smart Guide-i)
This software offers the maximum user convenience through dialogue manipulation from setup to processing. This includes writing processing programs and simulation checks.

2. LAUNCHER
This software offers shortcuts for quick access to specialized features and frequently used features.

CONTROLLER

FANUC 31i-B5 PLUS

Controlled axis / Display	
Control axis	9 axis (X1, Y1, Z1, B1, X2, Z2, A, C1, C2)
Simultaneously controlled axis	Max. 5 axis
Least setting Unit	X, Z, Y, B axis : 0.001 mm (0.0001 inch)
	C, B axis : 1 deg [0.001] deg
Least input increment	X, Z, Y, B axis : 0.001 mm (0.0001 inch)
	C, B axis : 1 deg [0.001] deg
Inch / Metric conversion	G20 / G21
Machine lock	All axis
Stored stroke check 1	
Mirror image	
Follow-up	
Backlash compensation	+/- 0~9999 pulse (Rapid traverse / Cutting feed)
Position switch	
Pitch error compensation	
LCD/MDI	15" color LCD
Operation	
DNC operation by the memory card	
Program restart	
Program check function	Dry run, Program check
Single block	
Feed function	
Manual jog feed	Rapid, Jog, handle
Manual handle	x1, x10, x100 pulses
Feedrate override	0~200% (10% Unit)
Jog feed	0~5,000 mm/min (197 ipm)
Rapid traverse override	F1, F25%, F50%, F100%
Override cancel	
Rapid traverse bell-shaped acceleration / deceleration	
Auto corner override	
Program input & Interpolation functions	
Interpolation Function	Positioning/Linear/Circular (G00/G01/G02/G03)
Exact stop mode / Exact stop	G61 / G09
Dwell	G04, 0~9999.9999sec
Helical interpolation	
Threading/synchronous feed	
Manual reference point return	
Reference point return	G28
Reference point return check	G27
2nd Reference point return	G30
Program stop/end	M00, M01/M02, M30
Optional block skip	1 ea
Max. programmable dimensions	+/- 9999.9999" (+/- 8digit)
Program number / Sequence number	O4 / N8 digit
Absolute/incremental command	G90 / G91
Plane selection	G17, G18, G19
Work coordinate preset	G52~G59
Work coordinate system	G54.1 P1~P48 (48 pair)
Manual absolute	"On" fixed
Programmable data input	G10
Sub program call	10 Step
Custom macro	
Addition of custom macro	#100~#199, #500~#999
Work coordinate Command	G15, G16
Work coordinate Interpolation	G12.1, G13.1
Helical interpolation	G07.1
Circular interpolation	G02, G03
Canned cycle	G73, G74, G76, G80 ~ G89
Optional chamfering/corner R	
Skip function	G31
Automatic coordinate system setting	
Coordinate system rotation	G68, G69
Programmable mirror image	G50.1, G51.1
Bidirectional pitch error compensation	
AI contour control(AICC) II	1,000 Block
Conversational Program	Smart Guide-i

Sub / Spindle functions	
Miscellaneous function	M 4 digit
Spindle speed command	S 5 digits, binary output
Spindle speed override	0% ~ 150% (10% Unit)
Spindle orientation	
Rigid tapping	
Tool functions / Tool compensation	
Tool function	Max.T3/T4 digits
Cutter compensation C	G40~G42
Tool length compensation	G43, G44, G49
Tool length measurement	Z axis INPUT C
Tool offset pairs	400 pair
Tool life management	
Data input / Output & Editing functions	
Input/output interface	Memory card
Embeded Ethernet	100 Mbps
Part program storage length	4M (1,024m)
Registered programs	100 ea
Memory lock	
Back ground editing	
Extended part program editing	Copy, move, change of NC program
Setting, display, diagnosis	
Self-diagnosis function	
History display	Alarm & operator message
Run hour / Parts count display	
Actual cutting feedrate display	
Graphic display	
Spindle / Servo setting screen	
Multi-language display	Selection of 5 optional language
Screen Saver	
Auto Data Backup	

Option	
Additional work coordinate system	G54.1 P1~P300 (300조)
Single direction positioning	G60
Scaling	
Manual handle interupt	
Data server	1 GB
High speed ethernet	100 Mbps
Tool load monitoring function	HWTM (Mounted)

Figures in inch are converted from metric values.
The FANUC controller specifications are subject to change based on the policy of company CNC supplying.

MOVEMENT FOR BETTER TOMORROW

ECO FRIENDLY

Minimizing Environmental Impact and Maintaining Sustainable Ecology

01 Achieve carbon neutrality

- Develop Net-zero Roadmap
- Heighten carbon emissions management
- Achieve carbon neutrality goals

02 Boost resource circulation

- Detail plans to reduce environmental impact
- Gradually reduce pollutant emissions
- Build eco-friendly supply chain

03 Establish environmental management framework

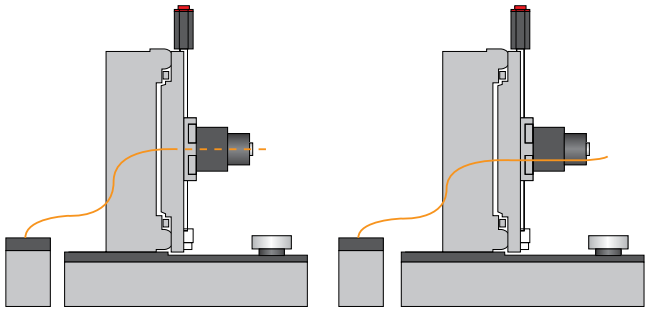
- Set up environmental management process
- Assess business impact of climate change risks

HYUNDAI WIA ECO SYSTEM

MQL (Minimal Quantity Lubrication)

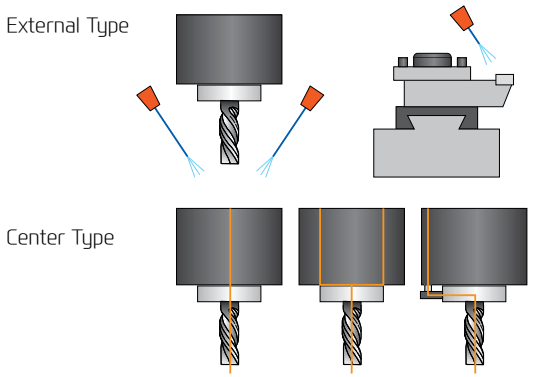
The goal of this system is to spray only the amount of lubricant required to prevent heat and chip build up at the cutting tool or work piece face.

Example of Machining Center Application



Center Type　　External Type

Example of Etc.

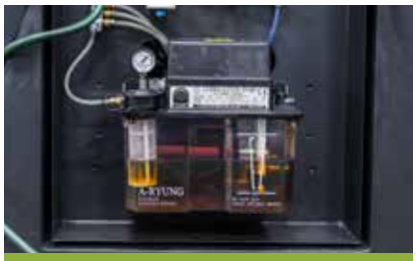


Oil Skimmer

An oil skimmer can increase coolant and tool life by removing tramp oil contaminants.

Mist Collector

Mist Collector reduces the amount of smoke and oil mist in the air. This helps build a safe and comfortable working environment and improve durability.



Lubrication System

By applying lubricant only when the machines axis are moving lubrication consumption is reduced by compared to standard systems.

HYUNDAI WIA ENERGY SAVING

HW-ESS (HYUNDAI WIA Energy Saving System)

HYUNDAI WIA Machine tool provides the optimum power saving function that can easily save energy with an intuitive user interface.

1. **Machine-ready power saving function** : Put all servo motors and other motors into sleep mode when no control or operation is done for a set time
2. **Work light auto-off function** : The work light is turned off automatically when no control or operation is done for a set time
3. **Chip conveyor auto power saving** : Operation/non operation time (timer) can be set to save energy
4. **Auto Power-off** : Auto power off after ending the an operation after a period of time
5. **Eco function** : Machine ready sleep mode can be activated/de-activated from the controller panel
6. **Power consumption monitor** : Real time power consumption can be monitored through the OP screen
